DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4-7, 12-14, 16 and 19-21, drawn to a particular method of forming an alignment layer and spacers using an ink jet technique, classified in class 430, subclass 7.
- II. Claims 2, 3, 8-10, 15 and 18, drawn to a method of fabricating a thin film transistor array and assembling a liquid crystal cell, classified in class 349, subclass 187.

Claims 1, 11 and 17 appear generic.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as assembling a liquid crystal cell in which the alignment layer and spacers are not formed via the ink jet technique of invention I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
